Languages English

PROJECTS

Attendance Maker App & Website [Link](#)

- a full-stack attendance management system for college students to track and manage class attendance efficiently.
- Implemented authentication, real-time data storage, and responsive UI.
- Technologies used: React.js, Flask, MySQL, Bootstrap, jQuery.

Wanderlust - Full Stack Web Application [Link](#)

- An Airbnb-style accommodation platform using Express.js, MongoDB, Mongoose, and Passport.js, featuring secure authentication, listing management, and dynamic search functionality.

KeepNotes [Link](#)

- Developed a responsive **Notes Application** using **React.js** with a modern and intuitive user interface.
- Implemented **CRUD operations** to add, delete, and manage notes efficiently.
- Technologies used: React.js, javascriptES6, responsive Design.

StudentHub [Link](#)

Dehradun, India

- About

StudentHub is a smart platform that helps students discover essential services like PGs, hostels, mess facilities, restaurants, laundry, and medical stores near their college. It provides location-based search, map integration, and an AI chatbot to help students quickly find reliable services around campus across India.

EXPERIENCE

Full Stack Developer

Kryolabs

Jan '25 — June '25

Dehradun

- Build and maintain end-to-end web applications using the MERN stack while containerizing applications with Docker and orchestrating deployments using Kubernetes. Develop REST APIs, manage databases, optimize application performance, configure CI/CD pipelines, and deploy scalable cloud-native applications. Monitor application health and ensure reliability, security, and high availability..

AWARDS

Hackathon winner

 **1st Prize**—TechFusion, **UTKRISHT 2025**, Tula's Institute for developing an innovative software solution.
